

Documentation

Discussion 11 – CSC 4033

Readings

Our reading selection for this discussion comes from the book “[Software Engineering at Google](#)” (available online), by Titus Winters, Tom Manshreck, and Hyrum Wright. The printed book lists the chapter on Documentation as Chapter 10, but it is labeled as 15 in the online version.

Required

- 1) [Software Engineering at Google](#), Ch.10 (~24 pages)

Recommended

Some of the other readings we have done discuss documentation, whether in the chapters we’ve read or in other parts of the books/articles. Feel free to pull notes from those sources too, or find new sources entirely. You may also want to look for examples of good documentation in the wild.

Learning Outcomes

- Explain how to tell the difference between good and bad documentation
- Give at least three benefits of maintaining quality documentation for a software project
- Discuss at least four high-level principles that can help keep the quality and usefulness of documentation high
- Give at least four examples of “best practices” for writing documentation within code
- Discuss how much personal responsibility to build technical writing skills for the purpose of creating good documentation developers should take on
